NOTES:

1. The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

2. Displacement is expressed in tons and represents fully loaded displacement.

3. The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing. For this reason the variance of the actual number of personnel on the ship may be 40% less than this figure.

4. There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Sixth Fleet. However, such variances with be relatively minor.
